

How to choose the arm machine spring

The distance of the fixation in the machine arm is 75mm.

Although, the most recommended is to get the biggest spring you find and play around with the distance of fixation in the arm

We have used a spring like the one on the left
k (DaN/mm) 0.0117 approx.

Material	Diám. Ext.	Medidas en (mm)
<input type="radio"/> cuerda piano <input checked="" type="radio"/> acero inoxidable	24.5	
K (DaN /mm)		
Largo	132	
Largo total	181	
		Espiras útiles
		Hilo
		1.5
	Diám. Int.	21.5
